About Organisation

Society for the Upliftment of Villagers & Development of Himalayan Areas (SUVIDHA) is a premier non for profit organization, registered under Section 21 of Societies Registration Act 1860 since 2004.

It has an experience of more than 18 years in the field of Institution Building, Demonstration of Sustainable Agriculture Practices, Organic Process Certification, Promotion of Clean Development Mechanism Technologies (CDM) for Climate Change Mitigation, Women Empowerment, Learning Level Initiatives for government schools, Mother and Child Health Care and Natural Resource Management for Holistic Community Development across 19 states in India.

Through institution building, SUVIDHA is engaged with 152 community institutions (Self Help Groups, Farmer Interest Groups and UG) covering 7028 total group members of which 2196 are female and 4843 are male.

Project Background

School is not merely a structure or a building. It is not only the assembly of children and teachers. It is a specialized, indeed, a very special place for children to learn and grow. It is a place that shapes their thoughts, one where they can ponder, question and share experiences. It makes them wonder and be creative. It propels them to raise questions and explore answers, identify problems and attempt solutions. School enables children to interact with their environment and give direction to their future. The responsibility of school is enormous. It should have an environment where teaching and learning become joyous experience for both teachers and children. The physical built environment, which includes not only the building and its interior spaces but also the exterior spaces and land space, play a crucial role in making this experience more meaningful. BaLA is an innovative concept towards qualitative enhancement in elementary education through intervention in school building infrastructure. Since buildings are the most expensive physical assets of a school, efforts should be made to derive maximum educational value from them. Thus, BaLA is about exploring uniqueness of three dimensional space as a child friendly learning resource for all children. The building elements of normal concrete shapes are modified innovatively to involve children creatively. The different

elements of BaLA may be located in interior and exterior spaces like classrooms, corridors and backyard so that a variety of learning situation are generated across the school space. The built structure of the school can also provide shelter during educational activities.

The BALA ideas were developed after comprehensive research in the following areas:

- Need for facilitation of all-round growth and development
- Need for literacy environment
- Problematic areas of comprehension in teaching and learning
- Socio-cultural-educational background at home
- Spatial aspirations from school
- Natural behavioural patterns in school space
- Construction, repair and environment enhancement of the school building
